

# Exciting New Trade Idea!

## \$SKYQ

### RENEWABLE ENERGY STOCK WITH MASSIVE POTENTIAL

Hello, Penny Stock News followers!

We're diving into an exciting sector that's gaining momentum—renewable energy. With growing demand for sustainable solutions, this company is making big moves, and the space is full of opportunity.

Read below to find out more about this company and why we like it!

## Sky Quarry Inc. (\$SKYQ): Pioneering Sustainable Oil Production (Float 16.3M)

Sky Quarry Inc. (\$SKYQ) is an innovative environmental remediation company dedicated to sustainable oil production and refining. The company specializes in recycling waste asphalt shingles and remediating oil-saturated sands and soils, converting these materials into valuable petroleum products. This approach not only addresses environmental challenges but also reduces reliance on traditional crude oil extraction.

### TECHNICAL ANALYSIS

- FALLING WEDGE:** \$SKYQ is currently trading within a falling wedge pattern, a formation that often signals a potential bullish reversal. If the stock breaks above the upper trendline with strong volume, it could mark the beginning of an upward move.
- BEATEN DOWN:** \$SKYQ has faced significant selling pressure over the past month, with the daily RSI lingering around 30—teetering on oversold territory. This suggests a potential rebound could be on the horizon if buyers step in.
- RSI BREAK:** \$SKYQ's RSI has recently broken its downtrend, suggesting that bearish momentum may be fading. This could indicate that the bottom is already in, paving the way for a potential trend reversal.

### FINANCIAL HIGHLIGHTS

Sky Quarry Inc. has strategically bolstered its financial foundation through recent capital raises and investments, ensuring long-term growth and operational expansion. With increasing demand for alternative fuel solutions and refinery disruptions creating new opportunities, the company's financial positioning sets the stage for scalable revenue generation.

- NASDAQ LISTING AND MARKET RECOGNITION:** In October 2024, Sky Quarry successfully listed on NASDAQ, increasing its visibility and credibility within the public markets. This milestone has strengthened investor confidence and positioned the company for future growth in the clean energy sector.
- STRATEGIC INVESTMENTS:** The company completed a \$7 million investment in their PR Spring facility, enhancing operational capabilities and supporting long-term profitability.
- REVENUE GROWTH:** Sky Quarry reported revenues of \$99,227 for the year ended December 31, 2020, marking its initial revenue generation phase. As the company expands its operations and infrastructure, revenue potential is expected to scale significantly with growing market demand.

### MAJOR NEWS & GAME-CHANGING DEVELOPMENTS

Sky Quarry has appointed Todd Palin as its new VP of Business Development, bringing strong industry expertise and key government ties that could help accelerate the company's expansion. With California losing nearly 10% of its refinery capacity due to major shutdowns, Sky Quarry is perfectly positioned to capitalize on the growing demand for alternative fuel solutions. These developments could be the catalysts needed to fast-track Sky Quarry's growth and solidify its position in the sustainable energy sector.

- Todd Palin's appointment brings key industry and government connections that could open new opportunities.
- California refinery shutdowns create a major supply gap, giving Sky Quarry a huge market opportunity.
- Sky Quarry's refinery upgrades and waste-to-energy technology position it for rapid expansion.

### STRATEGIC PARTNERSHIPS FUELING GROWTH

Sky Quarry has formed key partnerships to accelerate innovation and expansion in the industry. These collaborations strengthen the company's ability to scale operations and advance its sustainable solutions.

- FORLAND REFINERY PARTNERSHIP:** Improvements to the Foreland Refinery in Nevada position Sky Quarry to meet increasing regional fuel demands.
- ZACKS SMALL-CAP RESEARCH COLLABORATION:** Sky Quarry partnered with Zacks to enhance market awareness and investor communication.
- ENVIRONMENTAL & GOVERNMENT INCENTIVES:** The company is aligning with key stakeholders to support clean energy policies and drive sustainable infrastructure development.

### UPCOMING CATALYSTS AND FUTURE PROSPECTS

Sky Quarry is poised for significant developments that reinforce its long-term growth strategy. With a focus on scaling operations and deploying new technologies, the company is well-positioned for expansion in the environmental remediation space.

- EXPANSION OF ASPHALT SHINGLE RECYCLING (ASR) FACILITIES:** Sky Quarry plans to launch its first modular ASR facility, targeting five operational sites within the next five years.
- INCREASE PRODUCTION CAPACITY:** The company is optimizing operations at its PR Spring facility to enhance output and efficiency.
- REGULATORY TAILWINDS:** Sky Quarry stands to benefit from increasing government initiatives and incentives focused on sustainable waste management and clean energy solutions.

Sky Quarry Inc.'s innovative approach to environmental remediation, coupled with strategic financial and operational initiatives, positions it as a promising prospect in the sustainable oil production industry.
